DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ferraro in view of Miller. Ferraro appears to show the invention except that there are no cleats as claimed. Note for example that the handle has a concave section with sides and front and back portions. There are also rounded portions between the sides, front and back and a finger applying portion on the back of the handle. Miller shows the value of adding cleats to a handle to increase help the user grip the handle. Obviously one of ordinary skill in the art would add such cleats to the handle of Ferraro to facilitate its use.

Allowable Subject Matter

Claims 1, 3-9 are allowed.
